Director Special Education / Pupil Personnel

Dear Parent/Guardian:

As we move into the fall and winter seasons, weather factors sometimes play a major role in our daily lives. In order to insure the maximum safety of all of our students who live in the Brant Rock area when flooding occurs due to hurricanes, northeasters, and even just high seas, the following information is provided to you:

When conditions warrant the implementation for emergency stops for Brant Rock, ALL buses operating in that area will enter Dyke Road to Town Pier Road and proceed to the Town Pier at Central Street. At that point, the buses will reverse this route of travel to exit the area.

It is important that you watch for your child since he/she may be dropped at a location different from the normal daily bus stop. If you have any concerns about the route the buses will take, call your building principal for the latest update. Working together, we can insure that all children will be safe as they proceed to and from their assigned school should the weather deteriorate.

Sincerely,

Jeffrey W. Granatino  
Superintendent of Schools
